

Miers Merchant Centre Geotechnical Solutions

Miers can provide you with a full range of Geotechnical Solutions and offer cost effective and high performance solutions which we can deliver through our extensive network of UK branches

Geotextiles

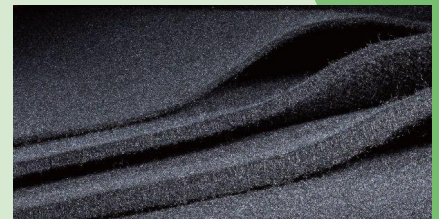

At Miers we provide an extensive range of both basic woven and non-woven geotextiles to high strength options for many applications throughout the Civils and Construction Industries. Also available are Miers mini-packs, ideal for domestic use or small areas.

Applications

- Reinforcement and protection
- Filtration and drainage
- Soil & granular fill separation
- Coastal defence

Features

- Various strengths, woven & non-woven
- Cost effective solutions
- Quick & easy installation
- Protection against erosion of coastlines

Geogrids

Miers can offer your customers a range of both biaxial and uniaxial geogrids. Used in many applications from haul roads, piling platforms to retaining walls and noise bunds. Full design service is available working alongside our supplier's design.

Applications

- Temporary and permanent haul roads
- Piling platforms
- Retaining walls and noise bunds

Features

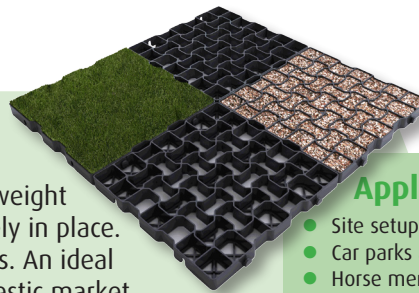

- Extensive ranges
- Reduction of aggregate layer thicknesses/costs
- Ease of handling & quick installation

Improving choice, quality and service

Paviour Systems

Available in both standard and premium option, Miers Pave Paviour Systems are manufactured from 100% recycled HDPE and are light weight with an interlocking design for easy installation that will stay securely in place. They can be filled with either decorative stones or seeded with grass. An ideal solution to both civil and construction industries as well as the domestic market. With its cell design providing excellent water dispersion, it's ideal for areas that are prone to flooding and can be integrated into Sustainable Urban Drainage Systems (SUDS). For areas that require marking out for car parking spaces, demarcation blocks are available.

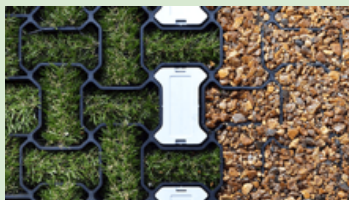

Applications

- Site setup and access roads
- Car parks and driveways
- Horse menages and green roofs
- Cycle paths and campsites
- Fire access roads

Features

- Lightweight
- SUDS approved
- Quick and easy installation
- Grass, gravel and resin options
- Recycled plastics

Erosion Control

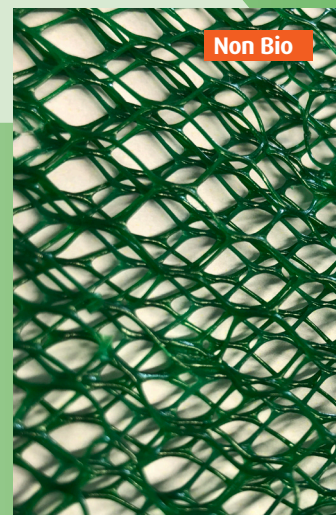

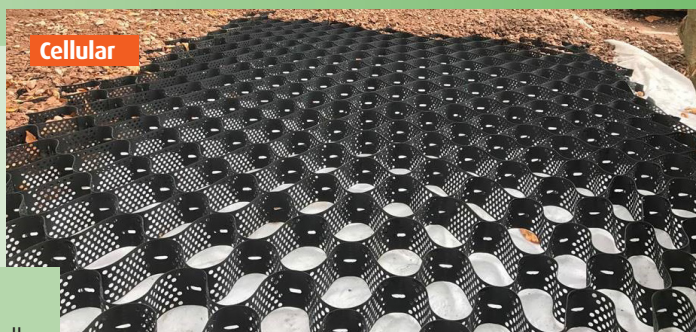

From non-biodegradable erosion control matting to a wide range of cellular confinement systems for tree root protection, soil erosion and load bearing systems, Miers offer a wide range of products.

Applications

- Embankments & slopes
- Riverbanks & wetlands
- Tree root protection

Features

- Lightweight and easy to install
- Pre-seeded options available
- Prevention of soil erosion

Other Products

Miers can offer additional geotechnical products besides those listed. From Silt Fencing, Japanese Knotweed Barriers, Weed Control Barriers and Temporary Flooring, Miers can provide a full project geotechnical offering.
